## PROFILE

I'm Chanchal Biswas. I'm web developer. Computer programming is my passion. So far I have eight years of experience in professional web programming. I always use time complexity, memory complexity, algorithm simplification, security and coding style very seriously in each of my web applications.

## WORK EXPERIENCE

I've finished lots of projects as a freelancer. Some of them are mentioned below.

**Inventory Management System**
kundutraders.com | 2023
PHP (Laravel v9.x), MySQL Stored Procedure
This system has been developed specifically as per the requirements of the company. They have a lot of data.

**OpenAI Messenger**
ai.kundutraders.com | 2023
PHP (OOP), SQLite, Javascript, OpenAI API
It has created a messenger for chatting that is used by the OpenAI API.

**University Management System**
2023
PHP (Laravel v9.x), MySQL Stored Procedure
It is a complete university management system still in its work in progress.

**University Routine Management System**
2022
C++ (For Windows Platform), Java (For Android Platform), MySQL, PHP (for API Development)
It was the University's routine management system and was done separately for Windows and Android platforms. It was a personal test project.

**Foundation**
aaronbarnettfoundation.org | 2020-2022
PHP (CodeIgniter), MySQL, Javascript
This is a foundation's website. It is very big and has a lot to do. It has been developed for a long time. (Rubric System, Board Member, Scholarship and etc)

**E-Commerce**
pryme.org | 2020-2022
PHP (CodeIgniter), MySQL, Javascript
It was a large ecommerce system. I worked for more than two years. Included (Multi Vendors, Dealers, Retailers, Shipping (UPS, USPS), Multiple Payment Gateway, RMA, Product Series and etc.

**Store Locator**
vendorlocator.7eye.com | vendorlocator.zienaeyewear.com | 2022
CodeIgnite, MySQL, Javascript (Javascript was use for work like React JS)
It was originally developed using the Google API to find all of the company's stores.

**Blog**
thinkschool.org | 2021
PHP (CodeIgniter), MySQL
This is a largest informative website. A large portion of YouTube videos is linked to it.

**Result Management System**
govtmuhsincollege.edu.bd | 2019
PHP, MySQL, Javascript
It was developed for a college's results management and it included a website.

**Property Management System**
lpmukltd.com | 20218
PHP, MySQL, Javascript
A company had a property management system through which they manage all their properties.

**Digital Agency**
webbang.co.uk | 2018
PHP (CodeIgniter), MySQL
It's a digital agency website. This website provide Domain, Hosting, Website Design and Development.

**API Used Skill**
1. Google Map API (Distance Matrix API, Maps Javascript API, Geocoding API, Places API)
2. MapBox API
3. Payment Gateway: Authorize.net, PayPal, Stripe
4. OpenAI
